CLP 2015 Conference Presentation_QATS PES.pptx

Hi Don,

Glad we were all able to meet today to discuss Region 8's Gold King Mine project needs.

I wanted to follow-up on a concept presented - the use of proficiency testing samples.

ASB suggests including proficiency testing samples/performance evaluation samples with your field samples, whether the samples go through CLP or elsewhere. Proficiency testing samples can add an additional level of quality to the data being generated. I have attached the QATS presentation from the CLP meeting this past Spring, which included some site-specific uses.

We have an extensive inventory of performance evaluation samples at the QATS facility or we can have one's designed to meet site-specific needs. And, the samples can distribute to CLP, Regional, or contracted laboratories working on this project.

I am happy to help if Region 8 is interested using proficiency testing samples.

Please let me know if you have any questions.

Regards,

Shari
